

FOREWORD

Texas Premium Game Breeders would like to welcome you to the auction of our generous guest sellers. We want to thank you for your interest in our event and what we have to offer.

Star S Ranch, Hatada Ranch, Waibel Ranch, Sola Fe, La Coma Ranch, and Silverhorn have all shared a common goal, to excel in breeding exotics and trophies for the hunting market. With this mentality, we have sourced the best genetics available and tailored our breeding to look at genetic traits for horn length, diversity, and adaptability of these animals. All animals presented in this auction have been selected based on these traits.

We want to thank our guest sellers for their consignments. We are certain you will be pleased with the outstanding animals on sale today.

It is with great pleasure to offer you some of our best genetics from all our ranches. Enjoy the day with us, and may you be successful in your bidding.

Sincerely, Texas Premium Game Breeders

COL. ROLAND "TOOTER" TREES

AUCTIONEER

Col. Roland "Tooter" Trees has been an Auctioneer for 30 years. Cattle, sheep, goats, exotic and domestic game are his areas of expertise. He conducted the first Mohair auction in the U.S. with a gross of 1.2 million. Trees is a graduate of Texas Tech University with a degree in Animal Science. He has judged livestock shows in Australia, Canada, Great Britain, Texas and across the U.S. He and his wife of 33 years, Terri, have two children. A daughter, Taitum, and son, Taos.

BREEDER INFORMATION

Sola Fe Ranch is founded by native Texan Colby Stephens and headquartered in Lockhart, Texas. Colby has been in the exotic industry for 30 years capturing, consulting and breeding top quality exotic and fallow herds. Exotic herds we specialize in are fallow, sable, bongo, kudu, impala, dama gazelle, amd scimitar horned oryx.

We have been leading the way in the fallow industry since 1998 when Colby started running a fallow meat operation, which he quickly shifted to focus on antler growth. Now, with over 20 years of a closed herd and being blessed with making the right decisions on breedings, we consistently produce the biggest fallow bucks. Not only do we boast the current SCI world record and numerous other gold medal deer, our breeding stock is highly sought after and our current focus. We started a new era of excitement in 2015, and took the fallow breeding market to the next level, when we sold our breeder Irish Elk (Now known as Thunderstruck). Our current breeders are continuing to prove themselves. This is where all the BIG bucks come from!

That being said, Sola Fe Ranch isn't just fallow. We have been building top quality super exotic herds with genetic lines from top breeders of each species.

Located in Valley Mills, TX, Hatada Ranch was founded in 1987 when the first super exotic stepped foot on the 1,200 acre ranch.

Through hard work and dedication from Doug Dutschmann and his family, Hatada Ranch now sits on over 2,000 acres of the most excellent terrain.

Along with his sons, Courtlin and Catlin, Doug was able to expand the herd into 20+ exotic species.

By allowing the large herds to roam freely throughout the ranch, plant spring and winter plots, provide year-round supplemental feeding and quarterly worming, it is apparent that health and consistency are key!

State-of-the-art irrigation systems and lush vegetation help to provide each species with the proper terrain.

Hatada Ranch prides itself on being a family-oriented ranch that specializes in giving you exotics with superior genetics.

Better known as "Red Gate" for its colorful entrance 15 miles north of Edinburg, La Coma ranch embraces a history as boldly painted as its nickname. The ranch started in 1883 as 130,000 acre tract of land purchased from King Ranch by Rhode Islander William Frederick Sprague; it remains perhaps the only large holding ever sold twice by the King Ranch. The ranch was named La Coma after the native tree with chewable blue berries that grow on the land.

In 1943, La Coma was purchased from the King Ranch by brothers Lloyd Bentsen, Sr. and Elmer.

Today Calvin and Marge Bentsen still own and run the ranch. Both are avid big game hunters but have turned their passion for hunting into conservation efforts through breeding. What used to be pasture for Santa Gertrudis and Bramham cattle is now home to over 26 different exotic species from Africa, India and Asia. Black Rhinos once thrived at La Coma Ranch boasting one of the most successful breeding operations in the US, but have since moved to Walt Disney World and different zoos. At La Coma Ranch we strive to breed with the best genetics and all of our animals are on large tracts of land. We look forward to helping all of our clients improve their genetics so they can be enjoyed by many generations to come!

BREEDER INFORMATION

Located in Deep South Texas, in the county of Duval, sits the Silverhorn Ranch. The ranch spans over 10,000 acres of brush country. Through years of management and manipulation, the Silverhorn boasts a variety of habitat types that provide an optimal environment for native and exotic species alike.

The Silverhorn Ranch prides itself in operating an animal breeding operation that focuses on high quality animals and customer service. We are raising animals to thrive in the harshest of Texas climates. Silverhorn currently has 7 species of breeding herds which consists of black sable, greater kudu, nyala antelope, gemsbok, axis, blackbuck, and whitetail deer.

The Silverhorn Ranch can provide the quality animals and integrity you are looking for.

Star S Ranch has been a premier hunting destination in Texas and an attraction to people all over the USA and neighboring countries since it was founded in 1996. The ranch covers over 14,000 acres of land and is near Mason, Texas in the heart of the Texas Hill Country, with the James River and Blue Mountains forming part of the ranch. Star S Ranch has also established breeding facilities in Fannett, Texas where multiple species are bred and adapt to the wet climate conditions.

Over the past two decades, we have had one goal in mind; to breed excellent trophies for the hunting market. With this mentality, Star S Ranch has sourced the best genetics available and tailored our breeding program to look at genetic traits for horn length, genetic diversity, and animal adaptability. Our breeding programs have intensified over the past decade while implementing our experience in breeding big whitetail deer and acquiring the best knowledge and skills for our exotic game breeding practices.

We have selected some of the best genetics Star S Ranch has to offer for this auction.

Waibel Ranches started as a small commercial cattle operation in 1996. Over the years of time and devotion, it developed into one of the most prominent cattle herds in the Pacific Northwest. This was achieved through research and development of industry standards, breed quality and nutrition.

In 2019, We brought our new vision to Texas, by purchasing a ranch for exotic breeding in the hill country of Boerne.

We have applied the same standards and morals to our operation and only strive to have the best genetics and animal health that we can provide in this competitive industry. Our animals are in herds, free roaming in large pastures, on over 7500 acres. They are provided the best feed and supplements through consistent feeding practices and our results are monitored by animal health and body condition daily. We are consistently introducing new practices and genetics to our herds, to diversify and acquire the best animals we can.

At Waibel Ranches, we have over 60 Breeding species and will continue to obtain new species to better our operation, provide quality animals to others and to help animals thrive in this industry.

DNA - MITOCHONDRIAL AND NUCLEAR

A NOTE FROM PROFESSOR BETTINE VAN VUUREN:

Mitochondria are cellular organelles, outside the nucleus, and are responsible for energy generation in cells. The mitochondrial DNA is inherited through the maternal lineage, with no contribution from the father. Mitochondrial DNA is therefore a good marker to trace female lineages, and provides information about the historical origin of lineages. It can also be used to trace the number of family lineages in a specific area or population. It is the equivalent of male surname transmission in humans.

Nuclear DNA is in the nucleus of cells. It contains coding and non-coding DNA, and is packaged as chromosomes (in antelope, there are typically 60 chromosomes per cell). Nuclear DNA is passed on from both the mother and father; with an offspring related to each parent by 50%, (full siblings are related to one another by 50%). Nuclear DNA provides valuable information about parentage and relatedness, and reflects the membership of a specific individual to different genetic groups (i.e., whether an individual is admixed, or pure within a specific genetic group).

Mitochondrial and nuclear DNA, either singly or in combination, provide valuable information that can assist in the selection process. Various strategies present themselves, but it is crucial that the breeder makes a decision early on in the selection process, and then adheres to it throughout the breeding program; otherwise, there will not be any real progress towards a specific end goal. For example, a breeder may decide that high levels of genetic diversity and variation is crucial in the management of specific herds. It would then be important to maximize the different lineages included in the breeding core, which would include animals from across the range of the species. A typical nuclear result may take the form of 20% Eastern, 50% Zambian, 30% Southern, with mitochondrial membership to any of the genetic groups. At the other side of the breeding-strategy spectrum, a breeder may decide on pure populations. Here, the mitochondrial result will indicate the historical origin of the maternal lineage, while the nuclear result should indicate membership within only a single genetic group, preferably the same group as the mitochondrial result. A typical result may take the form of 90% Zambian, with mitochondrial membership also in the Zambian, or Wes Zambian group (indicating a pure Zambian, or Wes Zambian animal). All, or the overriding majority of animals in the core breeding group, should follow these results. It is important that breeder keep in mind that some calves may show unexpected membership to non-selected groups. This is common and it reflects ancestral polymorphisms, also known as old blood. A grandparent, or even great grandparent, may have had membership to a different group (this is natural, and we even see these results in wild animals naturally occurring in areas).

YEARLING CAPE BUFFALO BULL AND HEIFER SIRED BY HAVOC

FEBRUARY 19, 2022 RULES OF AUCTION AND TERMS AND CONDITIONS

Registration: Prior to bidding, all prospective buyers must register and receive a bidder number. Buyer must indicate method of payment at time of registration. By registering as a buyer, the buyer agrees to the terms and conditions of the auction.

Description and Guarantee: Unless otherwise indicated the pictures provided may not be the exact animal and are indicated as such by "Example of animals" but they are equivalent representations of the animals you will receive.

Bidding: Each auction lot will be sold to the highest bidder, as determined by the auctioneer.

Buyers are bidding per piece to take the lot, unless where explicitly stated otherwise by the Auctioneer or in the auction catalog.

All goods sold by auction will be subject to a reserve price, unless specifically stated otherwise by the auctioneer conducting the auction

Bidding disputes: In the event of tie bids (bidding disputes), the auctioneer will settle any such disputes and his decision will be final. Once the auctioneer says "SOLD," a contract is created solely between the seller and buyer. A bidding sheet will be submitted to the buyer for their immediate acknowledgment and signature.

Announcements: Announcements from the auction block will take precedence over printed material, including the auction catalog and any other printed or digital material.

Online Bidding: This auction will be simulcast on the internet by DV Auction as a convenience. Online bidders agree that due to the nature of internet connections, the best way for acceptance of a bid is to be present at the auction. Texas Premium Game Breeders and their guest sellers will not be liable for loss of connection and/or technical

difficulties. In the event of technical issues, please contact DV Auction directly at (402) 474-5557.

Settlement: All accounts are due the day of the auction. Payment methods include cash, check, wire transfer or credit card.

A handling fee of 3% will apply to credit card purchases.

Transfer and Possession: The buyer will take possession only when full payment is received. All risk will carry over to the buyer once the animal/animals are safely loaded onto the buyers transport. Texas Premium Game Breeders and their guest sellers agrees to maintain, in good condition, the animals purchased in this auction until full settlement is made and the animals purchased on this auction have been loaded onto the buyer's transport.

Delivery and/or transport of the animals and any associated costs are solely for the buyer's account.

Liability: All persons who attend this auction do so at their own risk. Neither Texas Premium Game Breeders its guest sellers, auctioneer nor employees assume liability, legal or otherwise, for any accidents which may occur.

Contract: The above terms and conditions shall constitute a contract between the purchaser and seller of each animal and/or lot sold.

By entering a bid any prospective buyer binds himself or herself to these Rules of Auction, as well as any special conditions of sale set forth in the auction catalog.

A NOTE ON LIVESTOCK

Under Section 179 and 168k, significant tax savings can be derived as a breeder of livestock.

Exotic wildlife are deemed to be livestock. Therefore, when purchasing exotic wildlife for the purpose of breeding, the purchaser may deduct 100% of purchase price as well as all costs associated with the care of these animals in the year of acquisition. The current maximum deduction in one year is limited to \$2,500,000. If however, you exceed this amount, you may use section 168k (Bonus Depreciation) to deduct any excess.

If you intend to be, or are a breeder of exotic wildlife, all purchases made today are able to be deducted in full for the tax year 2022.

DV AUCTIONS TERMS AND CONDITIONS

THE FOLLOWING DESCRIBES THE TERMS WHEREBY DVAUCTION, INC. & WWW.DVAUCTION.COM OFFERS ACCESS TO OUR SERVICES

The following terms and conditions are applicable to all sales and purchases through our website(s). We may amend these terms and conditions at any time by posting the amended terms on our site. You can review the most current version of the Terms and Conditions at any time on this page. It is your responsibility to check this page periodically for changes. These terms may be revised at any time without notice. By using this website you are agreeing to be bound by the current version.

Eligibility to use our site.

Registering to view auctions on our site is free upon completing the required registration process unless otherwise stated within the terms of the sale. In order to bid on and purchase livestock/merchandise on our site, you must register for online bidding approval by submitting your application to bid. Upon approval, you will be allowed bidding privileges at the auction. Online bidding/buying privileges are available only to persons who can form legally binding contracts under applicable law. Without limiting the foregoing, our services are not available for minors. If you do not qualify, please do not use our services. We may refuse our services to anyone at any time, at our sole discretion.

GENERAL TERMS

Any announcements at the time of auction or bidding will take precedence over material previously provided. Transportation of livestock is the sole responsibility of the buyer. All shipping of any kind shall be at buyer's expense. All livestock/consignments sold through DVAuction, Inc. are purchased subject to federal and state inspection.

Any extraordinary health certificates, tests, or documentation required for shipment shall be at buyer's expense.

THE FOLLOWING RULES ARE SPECIFICALLY APPLICABLE TO AUCTIONS

Buyers: If you have the highest bid, you are obligated to complete the transaction. Bids are not retractable. Every transmission over the Internet travels a different route and can be delayed by a variety of factors, including the bidder's own computer. The time lapse between submission of a bid and its registration by the website can vary by several seconds resulting in the possibility of your bid being taken at a higher price than you intended. Do not submit bids during a flurry of bidding activity. Wait until bidding activity has subdued before placing your bid.

High speed Internet access (ie: dsl, cable, T-1, wireless) is required to bid at live auctions. DO NOT BID if you do not have high speed Internet access. See the support page under internet connection requirements.

Bids are queued by the dvauction.com host computer in the order received. Bid positions are awarded on a first come, first serve basis.

In the event of malfunction by the dvauction.com host computer, it is the Auctioneer's sole discretion to continue or stop the sale during any internet outages, service disruptions or downtime.

If the malfunction has not affected the sale of lots sold prior to the malfunction, they will be considered sold. Bidding will be open with no bid positions awarded upon resumption of the auction.

It is the buyer's responsibility to ensure that their internet connection and computer are working properly. DVAuction Inc does not guarantee that online services will be uninterrupted. Any malfunction by the buyer's computer or Internet service provider is not the responsibility of DVAuction, Inc.

AUCTION RULES (BUYERS)

Submission of a bid is a binding offer to purchase livestock, consignment or lot/draft.

A bid is valid until livestock, consignment or lot/draft is sold or auction closes. Submission of a higher bid by another party does not withdraw previous bids.

Auctioneer shall be the sole judge in determining the winning bidder in the event of a tie bid.

It is solely the responsibility of the buyer to verify liens and guarantees.

POLICIES

We are both buyer and seller friendly. Satisfaction of both parties is our measure of success.

A bid is valid until livestock, consignment or lot/draft is sold or auction closes. Submission of a higher bid by another party does not withdraw previous bids.

PAYMENT FOR LIVESTOCK/CONSIGNMENT OR LOT/DRAFT BY PURCHASER

DVAUCTION, INC. IS A BROADCAST & LISTING AGENT ONLY AND DOES NOT ACT AS A LIVESTOCK DEALER, LIVESTOCK MARKET, CLERK, SALE MANAGEMENT OR SELLING AGENT AND IS NOT RESPONSIBLE FOR ANY FINANCIALS OR GUARANTEES. CONTRACT FOR THE SALE IS BETWEEN THE BUYER AND SELLER.

Purchaser may be required to wire the purchase amount to the Seller's bank. Purchasers may be required to provide the Seller with a valid credit card and agree to debit said card for purchase amount.

No Warranties. We provide our service "as is" and without any warranty or condition, express or implied. To the maximum extent permitted by applicable law, we specifically disclaim the implied warranties of title, merchantability and fitness for particular purposes. All warranties expressed or implied are between Buyer and Seller.

Limit of Liability. In no event shall we be liable for lost profits or any special, incidental or consequential damages however arising, including negligence, arising out of or in connection with a sale made through this website.
